**Subject:** Scientific Reports: Decision letter for SREP-16-37981B

Dear Dr Sun,

We are delighted to accept your manuscript entitled "Gold nanoparticle-polymer nanocomposites synthesized by room temperature atmospheric pressure plasma and their potential for fuel cell electrocatalytic application" for publication in Scientific Reports. Thank you for choosing to publish your work with us.

You should have just received another email from [scientificreports@nature.com](mailto:scientificreports@nature.com) with instructions for the next step, which is to complete your publication agreements. To continue with your publication agreements you will need to create a new account on this new system. Please complete these as soon as possible so we can start preparing your manuscript for publication. The agreements include the licence, which defines the terms of publication, and billing information for your Open Access article. Please see our [FAQs page](#) for further information about article processing charges.

After we've prepared your paper for publication, you will receive a PDF proof for checking. At that point, please check the author list and affiliations to ensure that they are correct. For the main text, only errors that have been introduced during the production process or those that directly compromise the scientific integrity of the paper may be corrected at this stage. Please ensure that only one author communicates with us and that only one set of corrections is returned. The corresponding (or nominated) author is responsible on behalf of all co-authors for the accuracy of all content, including spelling of names and current affiliations.

To ensure prompt publication, your proofs should be returned within two working days; please contact [SciRep.Production@nature.com](mailto:SciRep.Production@nature.com) immediately if you wish to nominate a contributing author to receive the proofs on your behalf.

**Importance:** High

Dear all

Up on revision of the manuscript, I have made a slight change to the order of the authors to better reflect the contribution made by authors. however, this requires all authors to approve the change. I would appreciate if you could kindly approve the change by inserting your signature in the attached form and send back to me ASAP. Thanks in advance.

Dr Dan Sun    PhD CEng FHEA

Lecturer/Assistant Professor    Advanced Materials and Processing Research

School of Mechanical & Aerospace Engineering
