Dear Dr. Achermann,

We are pleased to inform you that your manuscript MS 86255R1, entitled "Propionibacterium avidum - a virulent pathogen causing hip periprosthetic Joint infection," will be published in Clinical Infectious Diseases.

Now that your article has been formally accepted for publication, we will soon send the manuscript files to Oxford Journals for processing and immediate publication on Advance Access. You will receive an email notifying you that your article has left the editorial office and is moved into production. At that time, Oxford Journals will contact you regarding a License to Publish form that you will be asked to sign online. The first line of the email will read: "Welcome to Oxford Journals!" Please note that, in order for your article to publish, it is imperative that you visit the link provided and sign your License to Publish form as soon as possible. Without your signed consent, Oxford Journals cannot publish your article. The sooner your signature is received, the sooner your work can be disseminated.

You will receive your official acceptance date from Oxford University Press once you have signed your license to publish. (Please note: If you are a UK-based author and are looking to comply with the HEFCE policy on open access in the Research Excellence Framework, you should use the official acceptance date when depositing in your repository.)

An invoice for page charges, as well as color figure charges, if applicable, will be sent by the publisher at the time your manuscript is processed for publication. This does not apply to correspondence or invited articles.

Authors or institutional press offices planning to publicize a CID article with a press release should contact the journal office (CID.EditorialOffice@oup.com) as soon as possible and review the related guidelines at [https://academic.oup.com/cid/pages_for_press]. Authors and their institutions are expected to respect any press embargos set for their manuscript.

Thank you for submitting your manuscript to Clinical Infectious Diseases.

Sincerely,

Robin Patel, M.D., Associate Editor
Clinical Infectious Diseases
