We are delighted to accept your manuscript entitled "Inactivation of the dnaK gene in <i>Clostridium difficile</i> Δ<i>erm</i> yields a temperature-sensitive phenotype and increases biofilm forming ability" for publication in Scientific Reports. Thank you for choosing to publish your work with us.

You should have just received another email from scirep.admin@nature.com with instructions for the next step, which is to complete your publication agreements. To continue with your publication agreements you will need to create a new account on this new system. Please complete these as soon as possible so we can start preparing your manuscript for publication. The agreements include the licence, which defines the terms of publication, and billing information for your Open Access article. Please see our <a href="http://www.nature.com/openresearch/publishing-with-npg/arti cle-processing-charges-faqs/?shunter=1484759720810">FAQs page</a> for further information about article processing charges.

After we've prepared your paper for publication, you will receive a PDF proof for checking. At this point, please check the author list and affiliations to ensure that they are correct. For the main text, only errors that have been introduced during the production process or those that directly compromise the scientific integrity of the paper may be corrected at this stage. Please ensure that only one author communicates with us and that only one set of corrections is returned. The corresponding (or nominated) author is responsible on behalf of all co-authors for the accuracy of all content, including spelling of names and current affiliations.

To ensure prompt publication, your proofs should be returned within two working days; please contact SciRep.Production@nature.com immediately if you wish to nominate a contributing author to receive the proofs on your behalf.

Acceptance of your manuscript is conditional on all authors’ agreement with our publication policies (see http://www.nature.com/srep/policies/index.html). In particular, your manuscript must not be published elsewhere and there must be no announcement of this work to any media outlet until the publication date is confirmed. We will inform you by email as soon as your manuscript is scheduled for publication, which will be after we have received and approved your proof corrections. Advice about media relations is available from the Nature Research press office at press@nature.com.

Your article will be open for online commenting on the Scientific Reports website. You may use the report facility if you see any comments which you consider inappropriate, and of course, you can contribute to discussions yourself. If you wish to track comments on your article, please register for this service by visiting the 'Comments' section in the full text (HTML) version of your paper.

**A form to order reprints of your article is available at http://www.nature.com/reprints/author reprints.html. To obtain the special author reprint rate, orders must be made within a month of the publication date. After that, reprints are charged at the normal (commercial) rate.**

We look forward to publishing your article.

Best regards,
P.S. If appropriate, you may also consider uploading any biologically- or biomedically-related protocols used in this manuscript to the protocol exchange, part of our on-line web resource, nature.com/protocolexchange. By participating, you are enabling researchers to more readily reproduce or adapt the methodology you use. The protocol exchange is fully searchable, providing your protocols and paper with increased utility and visibility. Please submit your protocol to http://protocols.nature.com/manuscripts. After entering your nature.com username and password you will need to enter your manuscript number (SREP-17-38991A). Further information can be found at www.nature.com/protocolexchange.
